

# GAVILON. HOW WE HELP YOU THRIVE.

Gavilon helps businesses around the world meet demand for their products by providing a reliable and cost-effective source of corn, soybeans, wheat, grain by-products and fertilizer. Every day, we buy and sell these commodities. But on any given day, external factors—like weather, political activity and physical delivery systems, can affect market supply and demand. That's why we study economic data, news and global trends—so we can help manage risk and minimize market disruption for our customers and suppliers alike.

## Strong U.S. Storage & Distribution Network With Offices In Destination Markets Worldwide

### Business Segments:

#### Grain & Ingredients

As the global market becomes increasingly complex, efficiently connecting producers and consumers is essential to providing consistent supply. That's exactly what we offer through our vast network of assets and partnerships.

- 136 grain facilities
- 354 million bushels of licensed storage capacity
- 36 million metric tons of grain distributed annually
- 8 million metric tons of feed ingredients distributed annually

#### Fertilizer

We originate and distribute competitively priced nitrogen, phosphate and potash products thanks to partnerships with global suppliers and one of the most efficient fertilizer distribution networks in the world.

- 81 fertilizer storage and handling facilities
- 1.2 million metric tons of combined storage capacity
- 5 million metric tons of fertilizer distributed annually

Headquartered in Omaha, Nebraska, we employ 1,900 people in more than 300 offices and facilities worldwide.
